Date 7 Up was created by Charles Lipar Gragg, who started his St. Louis-based company Howly Corporation in 1920. [1] The goal came with a formula for drinking a new lime soft 1929. The product, originally named The Big-Tub-label Lothaatid Naibe-Lime Soda, was launched two weeks before the 1929 Wall Street flash. [2] This contains the lyteme citrate, a mood-stable drug, until 1948. 3 [4] It was one of a large number of patented drug products popular in the late 19th and early 20th centuries. Its name was later shortened to 7-up. Lothaatid Naibso soda before it was later to be further cised to just 7 up by 1936. [Reference required] A myth is that the name of 7-up comes from drinking having a PHp at 7. It will make it neutral or fundamental on its scale. However, this is not the case, because the 7-up pH is close to 3.79, making it amaly on the pH scale and like other drinks of this type. [5] The origin of the name is not clear. [6]Although The Bretack claims that the name comes from seven important components, [7] while others claimed that this number was a coded reference to the original directive including in The Lotam, in which a nuclear mass is around 7. [8] The Bretack also claims that this name is a result of the fact that 7-up 7-ince bottles (The Bottle in The Koka-Kola and most other soft drinks was 6-ince bottles). 7 Up was a privately held corporation owned by the original founding families until Philip Morris in 1978, which sold it in two parts in 1986: the international division to The Pepsy [9] and the U.S. business in a group led by investment firm Hux & Haas. [10] In the Us, 7-up merged with Dr. Peppers in 1988; The Cabinet bought the company shared in 1995.
